Hello from Guam.

Guam is a US possession acquired after WWII. 30 miles long and variable between 1.2 to 12 miles wide. It is the largest island in the Mariana Island Chain. It sits above the Marianas Trench, the deepest water in the world. The actual deepest point measured is 35838 feet deep, that's nearly 7 miles.

I just arrived last night, and due to the time shift, I was up bright and early at 3AM.

So I decided to take some night shots.

I suspect I'll be sending more postcards before I leave.

Cheers,
G.
