Hello all.

This year during the 4th of July, where I live it was way too dry to do the annual Gray Mouse Tavern Ground Show. So I lit them off on Labor Day Monday.

This year I time-lapse recorded them (surprised?). Attached are some extracted frames, and below are the links to the video (recorded at 5 frames per second, played back at 30 frames per second, or a 6:1 time scale):

<http://igx.net/Video/TavernCAM/GrayMouseTavernGroundshow20100906-200Millisec30FPS.mp4> (Apple/i)

<http://igx.net/Video/TavernCAM/GrayMouseTavernGroundshow20100906-200Millisec30FPS.wmv> (Windows)

I gotta tell you, the finale was not quite what I expected. In the past when I used these incendiary devices, they were about 150-200 little shots that would go off at about once/second, until near the end where it would fire several at a time. This year I simultaneously lit two of these devices (expecting the same firing rate and behavior as before), and they fired off over 300 rounds in 24 seconds. What a rush. I don't think I'll be doing that again, at least not in front of my house.

G.
