Hello.

I crossed the Chesapeake Bay Bridge Tunnel again last week (see previous postcard - <http://igx.net/Postcards/Postcard20110530.pdf> for a CBBT refresher).

Of course I had TacomaCAM running full 1080 HD video.

I specifically timed the trip to be at the scenic stop at the South entrance of the South tunnel at sunset. Attached is one of many good images I took of the sunset, and here is a short video clip that is just the portion of the trip where I was on the CBBT:

Also are some still shots extracted from the video.

Cheers,
G.
