Hello from the Ocean.

We had several lines of thunderstorms pass through Sunday night. I switched BeachCAM to motion detect and caught some of the light show:

<http://igx.net/Video/BeachCAM/20120708OCLightning.wmv> (1920x1080 or 1080p, 4 minutes 15 seconds long)

It's rough (no editing, I've better things to do), but it gives you an idea how brilliant it was. Attached are some stills extracted from the video.

Toughest part about capturing images of lightning is knowing which way to point the camera.

Cheers,
G.
